

Justin J. Andre

justinandre0119@outlook.com | (949)-981-1037 | [LinkedIn](#) | GitHub: JAndre0119

EDUCATION

California State University, Fullerton

Fullerton, California

Pursuing B.S. in Computer Science

Expected Graduation, December 2026

Relevant Coursework: Data Structures, Algorithm Engineering, Deep Learning, Software Engineering

SKILLS

Proficient: Python, React, TypeScript, JavaScript, Java, Flask, C++

Familiar: Node.js, FastAPI, Django, Next.js, Angular, Go, HTML, CSS, SQL, MongoDB, PHP, C, Swift

Tools & Platforms: Anthropic Claude API, LangChain, AWS S3, REST APIs, PostgreSQL, pgvector, SQLite, Docker, Kubernetes, GitHub Actions, Jenkins, Git, Jira, Confluence, Windows, Ubuntu

Methodologies: AI-Assisted Development (Claude Code, Cursor), Agentic Workflows, LLM API Integration, Agile/Scrum, CI/CD, Unit and Integration Testing, REST API Design, Secure Coding, SDLC

PROJECTS

AI Study Buddy: AI-Powered Personalized Learning Platform

Spring 2026

Python (Flask), React, TypeScript, PostgreSQL, pgvector, AWS S3, LangChain, Anthropic Claude API, GitHub Actions

- Built a production full-stack AI study platform end to end as part of a 4-person Agile team at CSUF, designing a RAG pipeline that chunks uploaded PDFs with LangChain, generates 384-dim embeddings via sentence-transformers, stores them in pgvector with HNSW indexing for cosine similarity search, and calls the Anthropic Claude API to deliver personalized quizzes, flashcards, and summaries from student course materials; used Claude Code daily throughout development as a core productivity tool
- Engineered FERPA-compliant AWS S3 storage with AES-256 encryption and HTTPS-only bucket policies; built CI/CD pipeline with GitHub Actions featuring path-based filtering and automated pytest and ESLint quality gates on every PR; participated actively in code reviews incorporating feedback from teammates throughout each sprint cycle

Ledgerly: Personal Finance Tracker

Spring 2026

Python (Flask), React, TypeScript, SQLAlchemy, SQLite, Docker, Kubernetes, Jenkins

- Designed and built a full-stack personal finance application end to end, implementing a React and TypeScript frontend and a Flask REST API backend with SQLAlchemy ORM, secure bcrypt authentication, and relational SQL data management; wrote unit and integration tests throughout and participated in code reviews
- Containerized with Docker and deployed on Kubernetes with multi-replica Pods and Services; automated CI/CD pipeline via Jenkins, taking full ownership of the build, test, and deployment process

BiteCircle: Social Food-Sharing Platform

Summer 2025

Python (Flask), SQL, HTML, CSS, JavaScript

- Collaborated with a 4-person Agile team using Git for version control and code reviews to design, build, test, and deploy a full-stack social web application with user authentication, photo uploads, and a social discovery feed
- Built Python Flask REST API backend services and JavaScript frontend features with relational SQL data models, participating in sprint ceremonies and communicating progress clearly across the team

EXPERIENCE AND CERTIFICATIONS

Computer Science Tutor, Wyzant

Remote

Jan 2025 – Present

- Tutored students one-on-one in Java, Python, C++, JavaScript, and data structures including linked lists, AVL trees, heaps, and sorting algorithms; guided students through algorithm analysis, asymptotic notation, and mathematical induction using Socratic teaching methods
- Used Claude Code and AI-assisted development tools daily while building curriculum and reviewing student code, developing strong judgment around evaluating and validating AI-generated outputs before accepting them

Google Cloud Computing Foundations Certification

Issued: Aug 2025

- Earned the Google Cloud Computing Foundations Certificate, gaining hands-on experience with cloud infrastructure, networking, security, and data fundamentals across Compute Engine, Cloud Storage, and BigQuery

LFS158: Introduction to Kubernetes Certification

Issued: Oct 2025

- Earned the LFS158 Introduction to Kubernetes Certification through the Linux Foundation, gaining hands-on experience with container orchestration, cluster architecture, Pods, Services, and ConfigMaps

LFS167: Introduction to Jenkins Certification

Issued: Nov 2025

- Earned the LFS167 Introduction to Jenkins Certification through the Linux Foundation, gaining hands-on experience with CI/CD pipeline automation, build configuration, and Jenkins deployment workflows
